

Annex 1 to the legal information on damages.

LEGEND

– plot number 7/17

– plot number 7/16

– plot number 7/18

The map on the first page of the attachment shows the current status and borders of the real estate constituting the plots numbers 7/16, 7/17 and 7/18, formed from the plots number 7/11, which was divided. The subject of the lease agreements was each time a part of the real estate constituting the plot number 7/11.

Only plot number 7/16 is an investment plot, however the other two plots are designated for road plots, which constitute an improvement in communication for the investment plot. Therefore, despite not being included as investment plots, they will be actually used for the benefit of the project.

It is important that some of the lease agreements covered the area which, after the division of plot no. 7/11, included also other plots of land created as a result of the division, apart from plot no. 7/16, i.e. the area which is outside the investment plot, but as indicated in the opinion, it is currently impossible to precisely reconstruct the borders and the area which fell on each of the leased areas.
