RE: Investment titled: *Completion of redevelopment for the Vistula River flood embankments in Cracow*

Mr. Eng. Dariusz Adamek MSc  
Sweco Polska Sp. z o.o.  
16. Trybuny Ludów Street  
30-660 Cracow

In reference to your note dated 09/19/2016, ref. no.: HTK/AD/15008/3442,23/16 (received on 09/21/2016), related to the aforementioned investment, as provided along with attachments, including design documentation: *Construction Design – Hydraulic Branch*, as developed by Eng. Dariusz Adamek MSc in September 2016, the Municipal Heritage Conservator in Cracow informs that he accepts the provided solution concerning raising of the embankment crest without its extension and without placing a pedestrian and bicycle route on the embankment crest in a reach adjacent to Fort 50a Lasówka.

Relocation of a historic shrine is simultaneously accepted, from the embanked area at Pod Wierzbami Street; however, the new location shall be set out on the communal land or properties of the State Treasury and it shall be agreed with the local Office.

We additionally inform that for the purpose of developing a part of the planned embankment in the area of Fort 50a Lasówka, which is entered to the register of heritage under number A-973, one shall obtain a conservator's permit from the local Office.

This opinion does not release from an obligation of obtaining other agreements required under provisions of civil engineering law or under detailed regulations.

pp. MUNICIPAL  
HERITAGE CONSERVATOR  
Halina Rojkowska-Tasak  
Department Manager
